WESTCHESTER COUNTY AIRPORT

I have a frequency for Westchester County Airport in White Plains, NY of 119.700. I think it's the tower frequency but I'm not sure. I'm still new at this.

Good job on your site. Very helpful.

Thanks, Karen

DIGITAL DATA IDENTIFIED

<http://www.ibocradio.com/>

<http://www.ibocradio.com/NewsandInfo/PressReleases/press102699.html>

A few weeks ago on our weekly net I discussed digital data that was being received on two commercial FM frequencies in the NY metro area. Listen on 102.5 Mhz and 102.9 Mhz. Shortly after sending out a general E mail to the group, Mike Pollock forwarded me this info.

NEW YORK, NY (October 26, 1999) -- USA Digital Radio, Inc., a privately-held technology company owned by the nation's largest radio broadcasters, broadcast a live on-air demonstration of its In-Band On-Channel Digital Audio Broadcast (IBOC DAB) system at The Museum of Television & Radio in New York City last night. WNEW-FM, a CBS/Infinity Broadcasting station in New York, transmitted the historic broadcast from their tower atop the Empire State Building into the museum during the opening reception of the 5th Annual Radio Festival. Reporters and guests at the reception heard the CD-like sound quality of digital radio as syndicated talk show host Tom Leykis described the coming age of digital radio and then played a song clip from Eric Clapton's Change the World.

New York is one of five major radio markets across the country where USA Digital Radio is conducting its final phase of digital radio testing under experimental licenses issued by the Federal Communications Commission (FCC). USA Digital Radio's IBOC DAB technology is designed to give consumers a clearer, CD-like sound quality while listening to their favorite local radio stations, as well as provide new data services displayed on a radio screen, such as song and artist identification, stock

and news information, local traffic, weather, e-mail and Internet access, and more. In addition to New York City, USA Digital Radio is conducting tests in Baltimore, Cincinnati, San Francisco, and Washington, DC.

"We are delighted we were able to have this first-ever New York digital audio broadcast coincide with the Museum of Television and Radio's opening reception," said Robert J. Struble, president and chief executive officer of USA Digital Radio, Inc. "This event marks the coming age of AM and FM radio in a digital world. The successful performance of our IBOC DAB system in a city as interference intensive as New York is a strong indication of the robustness of our technology and its commercial viability."

"We are excited that our New York station, WNEW-FM, was selected to be part of the first live on-air digital audio broadcast in New York for such a prestigious event," said Dan Mason, President, Infinity Broadcasting.

"Infinity continues to be a strong supporter of USA Digital Radio's IBOC DAB technology as a way to enhance our listeners experience with radio while providing for a smooth transition from analog to digital."

Digital Audio Broadcasting (DAB) is a digital method of transmitting virtual CD quality audio signals to radio receivers. IBOC DAB is a broadcasting technology that uses the current radio spectrum to transmit existing AM and FM analog simultaneously with new high-quality digital signals. This technology provides a unique opportunity for broadcasters and listeners to convert from analog to digital radio without service disruption while maintaining current dial positions of existing stations. Listeners who purchase digital radios would receive their favorite radio stations with superior sound quality free from static, hiss and noise, and with reduced interference.

LIVE TIMES SQUARE VIDEO!

<http://www.earthcam.com/usa/newyork/timesquare/cam1.html>

Here's a neat site that provides 5 different camera views of Times Square. This should be a very active site on New Years Eve!

NY / NJ / CT SHOPPING MALLS LISTENING GUIDE

For readers of The Urban DX'er, the appearance of this column signals the official start of the holiday shopping season. This list was originally created by searching the FCC databases. Our readers contribute to the list throughout the year based on their monitoring. The next time your significant other asks you to take a trip to the mall, grab your scanner, earphone and make the best of the trip! A word of warning - much of what you may hear will be the real time surveillance of would be shoplifters. While your curiosity may get the best of you, you are strongly advised not to try and observe or identify the undercover store detectives. While it's far fetched, you could be charged with obstruction of justice and may find yourself in their security department.

If you venture into a mall not listed and discover some new frequencies, please make sure to send us the changes. E mail us at nydxa@hotmail.com Here's a few tips when looking for frequencies. Most mall activity falls in the 462.000 - 465.000 Search this region in 12.5 khz steps. Also, I have seen mall operations being conducted on the FRS channels. While not intended for this purpose, the price and availability of these radios makes them very popular. While in the malls, monitor the FRS channels and you will heard dozens of shoppers talking amongst themselves! Happy Scanning!

NOTE: The low-powered frequencies licensed by stores are often used for data transmissions from devices such as inventory scanners, etc., rather than voice transmissions.

UPCOMMING DX TESTS!

Monday, December 20, 1999 - WJIB-740, Cambridge, MA will conduct a DX test from 12:01-12:20 am EST. Owner Bob Bittner says they'll be playing "a specific type of music during those 20 minutes, which will be a mystery for all DXers to identify (an easy identification), and unique to whatever else is on the dial."

Reception reports may be sent to:

Mr. Bob Bittner, Owner/Manager, WJIB-AM, P.O. Box 848, Needham Heights Br, Boston, MA 02194
(Arranged by Blaine Thompson for the NRC CPC.)

Saturday, January 1, 2000 - KSTN-1420, Stockton, CA will conduct a DX test from 12:00 am - ? am PST (3:00 am - ? EST). Request line - (209)948-1420 - will be open to go on the air with New Year's greetings. The format will be '70s disco music. There will be a prize drawing from all reports received for a souvenir piece of the transmitter.

Reception reports may be sent to:

Mr. Paul Shinn, Chief Engineer, KSTN-AM, 2171 Ralph Avenue, Stockton, CA 95206
E-mail: KSTN@broadcast.net
(Arranged by Lynn Hollerman for the IRCA CPC.)

Sunday, January 9, 2000 - WFIF-1500, Milford, CT will conduct a DX test from 12:30 am - 12:45 am EST. The test will include tones, voice IDs, and Morse code IDs. Also note, International DX reports will ONLY be replied to via E-MAIL. For Domestic US reports only, they *MUST* include a SASE. Again, INTERNATIONAL reports will *ONLY* be responded to via E-MAIL.

Reception reports may be sent to: Mr. William Barnett, Engineer, WFIF Radio, 90 Kay Ave., Milford, CT 06460

E-mail: WFIF@aol.com

AC POWER CORD MYSTERY SOLVED!

Did you ever wonder why you always ended up with more AC Cords and plug in wall transformers? I know when I started in the radio hobby I would have done anything for a spare power cord. Now after more than 25 years in the hobby I have more than I can handle! But I still never could figure out how I ended up with so many spares. And then a friend send this web address to me and it all became clear, they really do multiply, this is what they are doing when we aren't looking.

TOP 50 SCANNER SITES!

<http://www.topsitelists.com/bestsites/k4lyp/topsites.html>

BRIGHTEN UP YOUR PRO200x

<http://dune.globe-net.net/~rc123/Robert/Backlight.html>

When's the last time you saw a PRO-2004 with a bright backlight? Radio Shack no longer sells replacement back lights for this model. It took a lot of research and a little luck to finally find a source. Bill Cheek had published an article recently on cutting a generic EL panel to fit. The tough part is finding a supplier. He "tricked" a manufacturer into sending him a sample by implying there would be a large purchase later. After I read this in his article, I was no longer surprised that none of the dozens of manufacturers would even bother to return my e-mails. For more details, visit the site above!

SCANNER DATA ON LINE

<http://listserv.uark.edu/scripts/wa.exe?S1=scan-l>

A lot of the information we publish here each month comes to us via the "Scan L" mail list. Because of the activity, subscribing might find you receiving more E mail than you can handle. The site above offers you the opportunity to view or search the Scan L archives for ant scanner related topic. I highly suggest you book mark this site and visit it often. N2NOV gets the credit on this one!!

USCG - ADDITIONAL FREQUENCIES TO MONITOR

In addition to the marine channels, the US Coast Guard also uses the following frequencies.

165.3375 Intelligence

165.3125	Law enforcement
162.125	Tac 1
162.325	Tac 2
163.125	Tac 3
157.05	Helicopters and cutters
237.9	Search and rescue helicopters
287.8	Air to sea rescue helicopters
383.9	Secondary
157.1	Civilian liason (marine channel 21)
157.075	Environment (marine channel 81)
143.28	Auxillary

ALLENDALE,NJ UPDATE

Allendale has a new freq for fire of 158.9400. The ambulance has used this freq for awhile now, but I just heard the fire dept. being dispatched to a smoke condition. Geuss folks are moving off 33.8600, finally.

Justin Mates

WELCOME!!

The Urban DX'er would like to welcome several new readers that come to us by way of the NNJ-Scan mail list. Please welcome Robert N2QXM, "Foulwind", Erik Arinson, "Mr Garrison", "AL", and "joski1"

For those of you who are unacquainted with the NNJ-scan news list, I suggest you log on to <http://www.onelist.com> and sign up. NNJ-scan carries late breaking news in the Bergen County scanning scene as well as other related news in the greater New Jersey - New York listening area.

The Urban DX'er would like to thank all those who contributed to this months issue!

Charlie - N2NOV, "R", KC2AYC, Rod - N2RVM, Bob Sanford - WB6NYC, Wally KA2WCB, "KAREN", Mike Pollock, Bob, N1MLZ, Justin Mates, Russ Asper
