### **NYPD USING NEXTEL?**

"Rifle Slug" a frequent E mail participant to the net passes along this bit of interesting info. "Today on my way home, I notice a PO from OCCB carrying a new type of Nextel portable radio. He was friendly and told me they did not have any more PD portable. So he ended up getting a new nextel model radio by Motorola. He also mention that this was a experiment type radio that is being field tested and the military is also looking at this type of radio system.

### **TIMES SQUARE BID**

Many of you may be visiting Times Square during this holiday season. Business which pertains to many districts in NYC are overseen by local community groups. N2NOV passes along these frequencies.

Times Sq. BID:	464.475

Grand Central Partnership:	461.575, 464.675
34th Street Partners:	461.150

### **BID = Business Improvement District**

### **BOO ON SONY!**

The NY Times ran an interesting article concerning Sony's Robotic Dog, Aibo. It seems they recently tightened their legal leash, invoking a controversial copyright law. They've cracked down on a programmer who distributes free online software that enables owners of Sony's Aibo to make their robotic dogs disco dance. In response, some owners have posted sympathy notes on the Internet, including one who wrote: "Now looking at my Aibo I only see pathetic greed on the part of Sony."

### **IRAN SEIZES 2,000 PROTESTERS, SATELLITE DISHES AS UNREST SPREADS**

NICOSIA: Iran has launched a massive crackdown

on dissidents and satellite dishes in response to the embarrassing outbreak of nation-wide unrest in support of the United States and democratic reform.

More than 2,000 Iranians were arrested over the weekend in connection with violent demonstrations in several major cities. In addition, Iranian authorities have moved to stop the relay of information from opposition groups to the Islamic republic.

Iranian authorities have confiscated more than 1,000 satellite dishes as part of an effort to stop access to television channels used by the opposition, Middle East Newline reported. The channels are based in the United States.

Nevertheless, the demonstrations were continuing Sunday, Iranian sources told World Tribune.com.

In the weeks since Sept. 11, the only major spontaneous pro-U.S. demonstrations have taken place in Iran where popular dissatisfaction with the government of supreme leader Ayatollah Ali Khamenei and President Mohammed Khatami has become widespread.

"Iranians have now concluded that whatever happens, no one will help them," said Dr. Assad Homayoun, president of the Azadegan Foundation. "They will have to rely on their own power to change the regime."

He said the U.S. decision to include Iran in a coalition intended to isolate the Taliban in Afghanistan could have the short-term effect of strengthening the regime in Teheran which has been a leading state sponsor of terrorism.

Washington-based sources said Iran's loss in a soccer tournament last week with Bahrain provided an opportunity for street demonstrations in several major cities.

The state-owned Iran daily said about 150,000 satellite dishes are expected to be confiscated. The operation would be the first time authorities have enforced a 1995 ban on satellite dishes.

Unrest has reportedly increased since the Sept. 11 suicide attacks on New York and Washington. Police have broken up demonstrations in solidarity with the United States.

The unrest became violent after Iran's soccer team

won another tournament with the United Arab Emirates. The fans attacked government buildings in Teheran and the government-sponsored Islamic vigilantes, torched police cars and chanted slogans against the Islamic republic.

The riots then spread to other Iranian cities, including Abadan, Isfahan, Kerman and Mashad.

***NYPD 10-44 TEAMS***

Hammer teams chasing anthrax, bomb threats, suspicious middle eastern looking males taking pictures, building evacuations and plenty of 10-44's. They can be heard on

17PCT-MTN & MTS (ZONE-4): **476.5875**

Special. Operation's. Div: **470.8375**

Traffic Division: **470.8125**

NYCTA: NYC Transit Authority

These guys have their hands full as well; checking suspicious bags left at stations, suspicious persons acting nervous, white powder on stairs and platforms and consequent train delays because of it all. There is some concern on how well can the system evacuate in case of chemical attack. Very worth listening in on.

Manhattan Ttransit Police: **160.905**

 4. 867.950    5. 868.450

ID 00-136 is "Javits Command" all NYSP units operating in the NYC area use this to request NYPD assistance or tow trucks during traffic situations or other details. Quite active, especially around 7pm at tour change. They also use another channel (00-137) for car-car purposes. Units will use their license plate numbers as their radio id's (as they do normally throughout the state) example: "2F13 to command post" would be a unit on loan from troop F (normally in the upstate Sullivan County area).

Charlie - N2NOV, "R" from Bridgeport, CT, Ralph Carraballo, Rifle Slug, Ralph Caraballo,

### **718<sup>th</sup> TACTICAL FIGHTER WING**

<http://www.718tfw.com/netmeets.htm>

<http://www.718tfw.com/>

Here's an interesting site that someone forwarded me. The first link above has actual combat audio in Real Audio format. The second link is a full featured web page about the life and times of the people who belong to this group. Definitely worth a look-see.

### ***ITS BCB DX TIME AGAIN!***

Colder weather causes much of the natural atmospheric noise to diminish. We also lose much of the noise associated with lightning. All these factors contribute to better and easier broadcast band DX'ing. For those new to this aspect of the hobby, this is the practice of listening to AM broadcast stations from great distances. About this time of the year various clubs devoted to BCB DX'ing arrange to have stations conduct DX tests. Special transmissions that distinctly identify them. For your time and trouble these stations will usually issue a special QSL card to verify reception. Here's the latest list!

Note the time of the test; they are in the local time of the station.
